patentable over the Hagenbucher patent and the Burke patent, individually or in combination.

With regard to new independent claim 27, the Hagenbucher patent fails to show or suggest a coil formed by the method recited in claim 27. For example, the Hagenbucher patent fails to show or suggest (with emphasis added): "positioning the *pre-formed* cooling ducts so as to be disposed between the layers", as is presently recited in independent claim 27. Since the Burke patent does not even disclose cooling ducts, it is clear that the Burke patent fails to cure this deficiency of the Hagenbucher patent. Therefore, Applicant submits that independent claim 27 and, thus, dependent claims 28-34 are patentable over the Hagenbucher patent and the Burke patent, individually or in combination.

Based on the foregoing, it is respectfully submitted that the present application is in a condition for allowance and notice to that effect is hereby requested. If it is determined that the application is not in a condition for allowance, the Examiner is invited to initiate a telephone interview with the undersigned attorney to expedite prosecution of the present application.

If there are any additional fees resulting from this communication, please charge same to our Deposit Account No. 050877.

Respectfully submitted,

ABB Technology AG
